

## City Building Kit

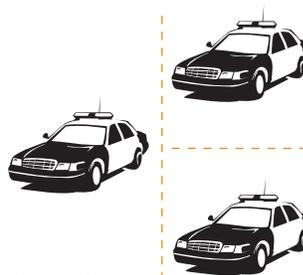

This handout is designed for use with the “Progressive City Planners” lesson plan from Teaching Tolerance ([www.teachingtolerance.org](http://www.teachingtolerance.org)). Before class, the teacher should create one City Building Kit for each three- to four-student group participating in the lesson. The City Building Kit consists of a paper grocery sack filled with glue containers, markers and other school supplies. For each City Building Kit you create, print out one copy of this handout, cut along the dotted lines to separate the game pieces, and place the game pieces in the bag.
